PROJECT -2

CREATE UBUNTU INSTANCE

The screenshot shows the AWS Management Console interface. On the left, there's a navigation menu with options like 'EC2 Dashboard', 'Events', 'Tags', 'Limits', 'Instances', 'Images', 'Elastic Block Store', 'Network & Security', and 'Placement Groups'. The main area displays the 'Instances' page. At the top, there's a 'Launch Instance' button and a search bar. Below that, a table lists instances. The 'ubuntu' instance is highlighted. Below the table, the details for the 'ubuntu' instance are shown, including its ID, state, type, and network configuration.
